

Drum Lifter & Drum Trolley Drum Suitability

Our drum catch is manufactured from laser-cut stainless steel. The catch can be easily adjusted to connect securely to drums of different types, sizes and materials. For a breakdown of the drums compatible with this catch, please see below. If your drums are not listed below, please get in touch to discuss your requirements.

Bespoke drum catches

At STS, we specialise in designing bespoke catch arrangements for unique handling applications. While our standard depalletisers accommodate a wide range of drums from 50 to 220 litres, we understand that industry requirements aren't always standard. If you are working with unusual shapes, construction, or capacities, we take pride in engineering a safe, custom handling solution tailored to your needs. Contact us today to discuss your specific requirements.
