

Drum Suitability

ATEX 205-Litre Drum Tumbler (Electric)

Product code: DME01-230V-10RPM-Ex

This model handles drums from
860 to 1010mm in height.

All STS products are designed with flexibility in mind.
We engineer equipment to handle as many drum
types and sizes as practicable.

Where new drum types are introduced to the
market we work hard to ensure units remain
universal.

Compatible drum types

Tight-head - steel - 200 litre

Open-top - steel - 200 litre

L-ring - plastic - 200 litre

Large MAUSER - plastic - 200 litre

Open-top - cardboard - 200 litre

Open-top tapered - plastic - 200 litre

Adjustable small-drum adapters

Part code: SDA01

We can supply our ATEX 205-Litre Drum Tumblers with a small-drum adapter. This allows you to mix small drums from 100 to 860mm in height in the standard mixer head. Simply adjust the stainless-steel adapter to suit different drum heights and diameters by moving two quick-release pins. The adapter is placed over the small drum and then clamped into the mixer using the original top clamping bar.

Small MAUSER - plastic - 60 litre

Adjustable small-drum adapter
(SDA01)
